

MC815

The MC815 model stands at the head of the Maeda range with a massive 8.09 tonnes lifting capacity making it the strongest lifter to date. With a 19.6m lifting height, new 10.4" multi function touchscreen monitor and the added bonus of 1000kg pick and carry capacity, this crane offers unrivalled versatility with great lifting duties.

The optional 1500kg SWL hydraulic 2-section Fly Jib increases maximum lifting height to 25.5m. There is an all new Searcher Hook giving class leading duties of 1000kg

New to this model is power lifting mode and multi outrigger mode, joystick control radio system, self levelling function, auto crane stow via remote and EU stage IIIB compliant engine to make it environmentally friendly.

- 8.09 Tonne Max Capacity
- 19.6m Max Lifting Height
